

In November 2017 Edison's pool underwent a deep cleaning. Elite Pool Tile Cleaning had a large task of cleaning and repairing tiles in the pool. First the pool had been drained and then the cleaning began. Tiles were first bead blasted, then hand scrubbed. Tiles were repaired or replaced and lane markers and deck depth markers were painted. Project is still underway and should be completed and pool filled by February 2018. So far contractor's team has worked approximately 800 labor hours.

Edison High School pool was built around 1950.
