RE: Tuberculosis and CPR renewal

California Education Code, section 49406, requires all certificated and classified employees that are employed by the school district, must be certified as free from active tuberculosis once every four (4) years. If you have received a notice of renewal, please hold off on obtaining a current renewal.

At this time, Health Services will not be providing TB assessments and employees will not be asked to break the shelter in place directive to go to a medical facility to complete testing. TB assessments will resume when school resumes.

CPR recertification has also been placed on hold during this time. Once school is back in session, there will be a 90 day extension for recertification of CPR. TB assessments will resume for classified staff, USA members and management when school resumes.

Should you have any questions, please contact Marcela Lane with Human Resources at mlane@stocktonusd.net. Thank you.
