

SPANISH FOR WORKING PROFESSIONALS

INDUSTRY-SPECIFIC COURSES TO HELP YOU COMMUNICATE EFFECTIVELY, ENHANCE CULTURAL SENSITIVITY, AND UNDERSTAND THE IMPACT OF CULTURAL DIFFERENCES

At Brandman we recognize that you are busy, highly-respected members of your communities, and your time is valuable. We also know that learning a language can take a lot of time. That's why we created our Spanish classes to provide a common understanding of Latino culture and a focus on industry-specific vocabulary.

Our accelerated pace means that you can more quickly take your new toolbox back to the classroom or the clinic, improving quality of care and instruction, building trust with patients and students, and breaking down barriers of misunderstanding.

Spanish for Educators

This undergraduate-level course is designed to provide educators with basic knowledge about Latino culture and Spanish language. PreK-12 teachers, paraprofessionals, and administrators will expand their ability to communicate effectively with Spanish-speaking parents and students.

Survival Spanish: Culture and Language for Healthcare Professionals*

This course provides basic Spanish communication skills and an understanding of Latino culture necessary to communicate with Spanish speaking clients in the healthcare environment about health-related issues.

*Available for BRN CE Contact Hours and BBS CPEU Credits
