

# California State Testing

## Remote Testing: Quick Links

### Background: State Testing Remotely

This spring, all eligible California students will take the year-end tests based on their current grade level. Testing may be done in person or **remotely**. This will depend on the type of test your child is eligible to take, your school and district policies, and guidance from your local public health agency. For remote testing done on a personal device not issued by the school, a secure browser needs to be downloaded prior to testing, instructional information below.

For more information, please visit the California Department of Education Spring Administration Website: [http://www.bit.ly/spring\\_21](http://www.bit.ly/spring_21)
